

Titanium Deckplate

The titanium deckplate will revolutionize the look, feel, durability, and functionality of your facility.

Deck plates are required to permit plug-in connections for touchpads, A/B/C backup pushbuttons, electronic relay judging, start speakers, and a signal to start the timing device at each lane.

This rugged in-deck solution features:

Titanium jacks

- Corrosion free from pool water chemicals like chlorines and bromines

Unique domed topography

- Protects banana plugs
- Peaks and valleys let the water flow off, dramatically limiting corrosion through electrolysis
- Better signal, less corrosion
- Smooth edges
- Will not yellow in the sun

Integrated speedlight connection

- No speedlight harness necessary
- Robust plug combining speedlight and relay judging signal

Warranty

- 5-year warranty

If you have 7.5" inch square deckplates (DP-7) in an existing facility, you can retrofit your facility with this solution. Call us today and start revolutionizing your facility.
